Getting Started

This is an introduction for the first user of our website.

Membership

Membership is sorted into Institutional membership, and Individual membership. Institutional member is a charged member with contents service contract. Anyone could sign up individual membership with free of charge.

Membership is sorted as follows:

Institutional Membership

Institutional member is a member of institution or association with charged contents service contract, like university or research laboratory. Institutional members could use the contractual contents with PC, and other terminals within the IP bandwidth of institution.

Individual Membership

It is a common membership that anyone could sign up with free of charge. This cannot use charged services, like the original texts.

Individual Access Service Membership

This is a membership which is an individual member as well as individual access service member. Individual access service members could use the contractual contents with PC, and other terminals outside of the IP bandwidth of institution, like home.

How to Login

An Individual member has to login to use Individual access service, and Individual account features. You can log in as follows:

1. First, if you are currently logged in as an institutional member, click 'Logout'. [Check login Status](#)
2. Click [Individual Login](#) from the utility menu at the top of the screen.
3. Input your ID and Password, and click Login.

Institutional member is logged in automatically within the IP bandwidth of institution, so does not need to log in individually. If you are currently logout, you could log in as an institutional member by following below:

1. Click [Institutional Login](#) from utility menu at the top of the screen.
2. You could find the welcome message and institutional login information after certification.
3. If you are outside of the IP bandwidth of institution, you cannot log in as an institutional member

Select Database

Media Korean Studies DB provides data service that is specialized by each database. Service item for each database is like below:

Service item for each database

Database	Book-list	TOC	Original type			Index	Search			
			Image	Text	Trans.		Total	TOC	Text	Place-name ¹⁾
The Collection of Korean Anthologies	✓	✓	✓				✓	✓		✓
Korean Literary Collection in Classical Chinese	✓	✓		✓		✓ ²⁾	✓	✓	✓	✓
The Collection of Korean Geography, Customs and History	✓	✓	✓				✓	✓		✓
Korean Translation of Koryōsa		✓	✓	✓	✓	✓	✓	✓	✓	✓
Historical Resources for Relations between Korea and Japan		✓	✓		✓	✓	✓	✓		✓

- 1) 1Placename search is a search function that shows placenames which appear from the original text, and table of contents, mapped on the actual map . Database with the original text index is mapped with keyword classify into placename. And database without the original text index is mapped by all texts.
- 2) Index of <Korean Literary Collection in Classical Chinese>is available from vol.1[Kyewonp'ilgyeongjip桂苑筆耕集] to vol.158.[Iramjip一庵集]

You can select the database as follows:

1. Click the  menu icon at the top of the screen.
2. Select database you want to read from the expanded list.

How to use Individual Access Service

Individual access service helps institutional members to access the website easily at the outside of institution.

Institutional member is logged in automatically when the user locates within the IP bandwidth of institution. Therefore, if a user is within the IP bandwidth, like a university building, the user can use the database that is subscribed without any other certification. But if a user is outside of the IP bandwidth, the user cannot be certified as a institutional member, so user cannot read the database. To resolve this inconvenience, a user can use Individual access service. With Individual Access Service account, a user can access the website outside of IP bandwidth, and can use personally specialized functions such as bookmarks. To use this service, a user needs to set up as an Individual Access Service member as follows:

1. Access Media Korean Studies website within the IP bandwidth of institution. [How to check login status](#)
2. Click Log out. [Log out](#)
3. If a user is not an individual member yet, the user needs to sign up. [How to sign up](#)
4. Click [Individual Login](#) at the top of the screen.
5. Click [My Page > Settings](#) for Individual Access Service
6. Click 'Institutional Login' below.
7. Institution? Please click "Individual access with institution.
8. Check the breakdown of set up.
9. You already logged in when you find  [your institution's name](#) at the top of right side .

To use Individual access service, please logout and log in again with individual access account. [How to login](#)

Search

System provides total search, search through database, and search through book(anthology) functions.

Total Search

Total Search signifies Full Text Search through all of original texts including Book Title, Author, Table of contents, Original text, and Translation of database. A user can search on every database that is available. Also, this function provides search options if needed. A user can use the total search page by clicking the [Q](#) [Total search](#) button from utility menu at the top of the page.

1. Input the search word in the search box, and hit enter.
2. User can select specific database by clicking the certain database from 'Select DB' at the left of the page, and click [Apply](#).
3. You can see the search result by book/anthology, and text. Also, your search word is highlighted with yellow color.
4. To see more search result, click the [book/anthology](#), or [text](#) tab at the top of the screen.

Search through database

Search through database function is available at the first page of each database. There is a difference between data components of each database, therefore the UI of first screen would be different. In this user manual, <The Collection of Korean Anthologies> is used as an example.

1. Click  the menu icon at the top of the screen, and click [<The Collection of Korean Anthologies>](#) from the database list.
2. The list of anthology is shown in default. Input the search word in the search box at the right side of the list, and hit enter.
3. The result will be shown applying into anthology's name, and the author. Also, your search word is highlighted with yellow color.

If you want to search from [<The Collection of Korean Anthologies>](#)'s every article, do as follows:

1. If you want to search from [<The Collection of Korean Anthologies>](#)'s every article, click the [Article](#) button at the left side of the search box.
2. Input the search word in the search box at the right side of the screen, and hit enter.
3. The result will be shown applying into article's name, and the author.

[<The Collection of Korean Anthologies>](#), [<Korean Literary Collection in Classical Chinese>](#), and [<The Collection of Korean Geography, Customs and History>](#) have same UI. [<Korean Translation of Koryŏsa>](#) and [<Historical Resources for Relations between Korea and Japan>](#) have search through book function.

Search through book(anthology)

Search through book(anthology) is the function that searches through the full text of specific book(anthology). Search from the specific book(anthology) from the book(anthology)'s Online Reader like below:

1. Click the search tab from the left panel of the Online Reader.
2. Input the search word in the search box, and hit enter.
3. The result will be shown applying into author, table of the content, and the original text. Also, your search word is highlighted with yellow color.
4. User can read the database by clicking [View table of contents](#) or [Quick view](#) at the bottom of the result.
 - **View table of contents**
This function shows the location of specific text from table of contents, before viewing the result texts and images at the right side panel. This function would be useful when the user tries to find location of the result from the original text.
 - **Quick View**
Quick view function shows the contents on the right side of the screen, without any changes of search result. This function would be useful when a user wants to read the search result generally.

How to use smart search

Smart search is a function that helps expanding the keyword when searching, including automatic conversion between Korean/Chinese character. For example, when a user searches with keyword '최치원', the system also searches '崔致遠' automatically as well. Smart search function is activated in default.

Smart search expands the keyword like below:

1. Recognition of phonetic value Korean/Chinese
2. Recognition of Chinese heterography(同字異音)
3. Change Simplified Chinese/ Traditional Chinese

If user wants to see the results only that matches with exact keyword, user needs to remove the smart search function. To remove smart search function, do as follows:

4. To expand the option window, click the 'Search▼' menu at the left side of search box.
5. Tick the 'Off smart search', and smart search function is turned off.
6. Input the search word in the search box, and hit enter.

Placename Search

Placename search is a search function that shows placenames which appear from the original text, and table of contents, mapped on the actual map . Like the picture below, the user can change the center point of the map at the left of the screen, or extend/contract the map, to search the article in the area in the circle. The result will be shown at the right panel of the screen. Like the picture below, the user can change the center point of the map at the left of the screen, or extend/contract the map, to search the article in the area in the circle. The result will be shown at the right panel of the screen.

If user wants to do placename search, follow as below:

1. Click Total search > Placename search(tab), or click  the menu icon at the top of the screen, then click Placename search.
2. Map is at the left side of the screen, and the search result appears at the right side of the screen.
3. Move the center point by double clicking, dragging, extension/contraction the map.
4. The article located in the circle based on the center point of the map appears at the right panel of the screen
5. If a user wants to see the specific database, click [Select DB](#) tab at the right panel of the screen, choose database, and click [Apply](#).

* Placename is based on administrative district of Japanese colonial period(1914, Do/Pu/Kun).

How to read the original text

A user can read the original text with Online Reader. With Online Reader, a user can use texts, images, and search through book function synthetically. To open Online Reader, click [Read online](#) at the book(anthology)'s detail page.

🔍 Database of <Korean Translation of Koryōsa> and <Historical Resources for Relations between Korea and Japan> are provided as a form of Online Reader.

🔧 How to install Adobe Flash Player

Specify the layout of the Online Reader

A user can hide the 'Browsing area' by clicking the area adjustment button. Also, browsing area is adjustable by dragging the area adjustment button.

1. A user can hide the browsing area by clicking the area adjustment button.
2. Browsing area appears if a user clicks the area adjustment button again.
3. Browsing area and the original text area are adjustable freely by dragging the area adjustment button.

Online Reader is sorted into normal mode and extended mode depends on the size of the screen.

1. When a user clicks  at the right upper side of the Online Reader screen, screen switches to extended mode.
2. At extended mode, the user can switch the screen back to normal mode by clicking .

How to use index search

When index is applied to the original text or translation, the indexed text appears as different color.

Orthography of Chinese characters which have no font

- General method of separated character is used for <The Collection of Korean Anthologies> and <The Collection of Korean Geography, Customs and History>. In case of 禁, it is separated as [林/示]
- <Korean Literary Collection in Classical Chinese> uses image letters.

Other database, including <Korean Translation of Koryōsa>, uses Ideographic Description Characters of Unicode. Ideographic Description Characters of Unicode is a method that shows Chinese character not only separation, but configuration. For instance, “禁” is described as “林示

Database

This chapter explains how to filter the list and to search by the database.

How to filter the list

A user can see Book(anthology) list and Article list. Article list is an integration of all articles from database. To see the anthology list and the article list, please follow as below:

1. Click the  menu icon at the top of the screen.
2. Select database you want to read from the expanded list.
3. Anthology list is shown in default, **Anthology(3,976)** button is active at the top of the screen. The number in blanket() is the number of total books.
4. A user can change the list into total article list, by clicking **Article(1,047,610)** button.

To use the filter, please use the filter area at the right side of the list. Available filters are shown by each database. The filter follows format as below:

1. Adjust the filter by changing slider, or checking the filter.
2. Click **Apply**.
3. To off the filter, click **Uncheck All** button at the top of the filter title.

But, when you click 가나다 button, AtoZ filter applies immediately. To off AtoZ filter, click the **AtoZ off** button as in the <picture> below.

Available filters are shown by each database

Database	Classification	AtoZ	Period	Format	Written year	Literary Style	Administrative District
The Collection of Korean Anthologies	Anthology	✓	✓	✓			
	Contents	✓			✓	✓	
Korean Literary Collection in Classical Chinese	Anthology	✓	✓				
	Anthology				✓		
The Collection of Korean Geography, Customs and History	Book	✓					✓
	Anthology						✓

- **AtoZ** : This is the filter in order of spelling.
- **Period** : This is the filter in order of specific era.

- **Format** : Filter by format.
- **Written year** : This is the filter in order of written year of the article. (For Anthology only)
- **Literary Style** : This is the filter in order of literary style of the article. (For Anthology only)
- **Administrative district** : This is the filter in order of administrative district of the anthology. (Province unit). Administrative district of each article can be checked with [Placename search](#) function.

💡 Article list is not provided for <Korean Translation of Koryŏsa> and <Historical Resources for Relations between Korea and Japan>. List of articles are provided in Online Reader.

Search through database

Search through database is a function that makes a user enable to search through specific database list directly, without using total search.

1. Click the  menu icon at the top of the screen.
2. Select database you want to read from the expanded list.
3. The book list is shown in default.
4. Input the search word in the search box at the top of the filter at the right side of the screen, and hit enter.
5. To search from the article list, switch into article list by clicking the article list at the top of the screen.

💡 If filter function is applied, the system provides internal scan with the filter.

Bookmarks

With this feature, a user can bookmark anthologies, and articles. To use bookmark function, a user need to login as a Individual Access Service account. [Check login status](#)

1. Click the  menu icon at the top of the screen.
2. Select database you want to read from the expanded list.
3. To add a bookmark, click the star button at the left side of the list. The star button is changed into yellow, and added to bookmark.
4. To see the bookmark list only, check the checkbox at the left upper side of the list.
5. To off the bookmark only mode, uncheck the checkbox at the left upper side of the list.

Table of contents

A user can explore the specific book(anthology)'s table of contents at the bottom of the screen. First, the user needs to move to relevant book's detail information from the list.

1. Table of contents is shown as a tree mode, when a user scroll down to the bottom. During its loading, loading sign image will be shown.
2. A user can (expand/collapse) the table of contents by clicking items.
3. To move to the specific contents, double-click the table of contents.

Viewing the table of contents by its literary style is available for <The Collection of Korean Anthologies> and <Korean Literary Collection in Classical Chinese>.

1. Click specific literary style which you want to filter at the right side of the table of contents, and click [Apply](#) button at the bottom of the screen
2. The table of contents of relevant literary style is expanded and colored into red.

General Information

This chapter is about general information of service during using the website.

Message about Access Authority

If a user don't have authority to view the original text, below message would appears:

Users can check their access authorities by following as below:

1. First, users need to check whether they are currently logged in, or not. [Check login status](#)
2. If you are currently using our website out of your institution, you need to check that you are logged in with Individual Access Service. [My page > Settings for Individual Access](#)

Report an error

If you find any error from our website system, please report us the error, so we could expedite action about the error. To report the error, please do as follows:

1. Open the page which has difficulties.
2. Click [Report error](#) button at the right upper side of the Online Reader, or at the bottom of the screen.
3. Fill in all of the blanks, and click [Send](#).
4. The report form will be sent to the person in charge.

Check login status

A user can check the login status according to each membership.

Institutional Membership

When a user is logged in as a institutional membership, red colored member icon and institution name appears like  MK UNIVERSITY, in utility menu at the top of the screen.

Individual Membership

When a user is logged in as a individual membership, red colored member icon and username appears like  홍길동, in utility menu at the top of the screen.

Individual Access Service

When a user is logged in as a individual access service membership, red colored member icon, and username(institution name) appears like  홍길동(MKSTUDY), in utility menu at the top of the screen.

Thank you.
